## 1. List of problems

Nº	Problem	Accept Proposed Solution?	Solution or Justification	Fixed?
1	Wrong hours in events.	Yes, even though the solution was problem with the database not the application itself	Instead of using the current hours, use the chosen ones.	Yes
2	Can't interact with calendar.	No	It was not in the scope of our application	No
3	Can't create a group with participants.	Yes, as the groups are not correctly saved in the database and those users were placeholders.	Add proper workflow to ensure the user maintains the intended objective when creating a group.	Yes
4	All fields are mandatory but it's not clear	Yes	Add an indication to the mandatory fields or their labels.	Yes
5	Can't see event location details	No	It was not in the scope of the prototype.	No
6	Location, interest or time-based filtering is not possible.	No	The filter search was not in the scope, only the search function	No
7	Group privacy switch is hidden, and scroll is not visible.	Yes	Display the scroll with more clarity or display all the information without the need for a scroll view.	Yes

8	Group privacy is not consistent.	Yes, even though we couldn't replicate the error.	Display the scroll with more clarity or display all the information without the need for a scroll view.	Yes
9	Groups duplicated	No	We couldn't replicate the error, but it must a problem with a database	No
10	Add button is not matching the intended action in friends' screen.	No	We did not implement a add friends screen, it was not within the scope	No
11	Can't access friends' profiles in user profile screen.	No	That feature was not in the scope, merely a placeholder	No
